Vehicle Operation – pilot vehicle traffic control

Units of Competency:

- TLIF3060 Control traffic as a pilot vehicle operator

Overview

This course consists of a unit of competency in the Transport and Logistics Training Package; it is delivered in a classroom environment, encouraging interaction and knowledge sharing between participants, with practical application of skills in a simulated work environment.

This course is specifically for persons who will be directing traffic with the use of a stop/slow bat and a pilot vehicle in the vicinity of an oversized vehicle. Candidates should enquire of their State Regulator regarding licensing requirements.

Who is this course for?

This course is targeted at licensed drivers requiring approval to control traffic as a pilot vehicle operator.

Participants should have literacy and numeracy skills to the level of completing workplace forms.

Course content

- Legislation, regulations and codes of practice
- Hazard and risk assessment and minimisation
- Workplace policies, procedures and industry best practice
- Warning systems, controls and indicators
- Operating procedures for controlling traffic during piloting duties
- Identifying inconsistencies with optimum performance
- Undertaking pre-and post-operational checks and relevant document completion
- Height, width and mass limitations of bridges, tunnels and other structures
- Typical problems that may arise with technology
